

If you had to describe me as a teacher in one sentence, what would you say?

- Mr W was very enthusiastic and open to assist students
- Responsible
- Passionate towards his work.
- very nice, and takes time to teach the concepts!
- Kind, approachable, and passionate.
- Good at handling the difficulties of the concepts taught in class, appropriately introduces more complicated concepts
- Kind
- Very kind and easy to ask questions, which is the most important thing a teacher can be
- A fun passionate math student.
- He is fun and approachable
- Mr. W is a very responsible, funny, and organized teacher who is always opened to curiosity.
- You put a lot of effort into ensuring that students will go through the course while remaining engaged and comprehending the material.
- Energetic, reasonable, positive.
- Lessons were unique and engaging

What did you like the most about the course?

- I like figuring out cool patterns or fully understand how the numbers can go together to solve a problem.
- I liked most how I was able to expand my mathematical knowledge in this course and not limiting myself to the basic concepts, but doing the enriched part of every unit.
- It was really fun, there was engaging challenging questions
- I liked how you made lessons balanced both with math and also with engaging activities like the anonymous question submissions on the board.
- the balanced amount of practice
- Mr. W was very open to questions and reasonable with grading.
- Your lessons were different everyday which made them more interesting and engaging.

What's something you'll remember from class?

- the motivational note Mr W gave me on the last day
- The fun activities (bingo, kahoot)
- Math
- Introducing more advanced concepts such as limits and integration, using Desmos as a tool to help visualize expressions
- The fun activities such as riddles and challenge problems
- I will definitely remember the fun questions we did and I will hopefully remember the series and sequences formulas.
- The golden ratio is everywhere
- The Golden Ratio and all of those Greek letters.
- The question activities from the slides, and the math we learned (hopefully 😊)
- I will remember this class as the only class with good teachers this semester.
- The cool enrichment topics

What made this class different from other math classes?

- This was the most fun I've had in a math class and the most interested I've ever been in math
- Since it's AP, a lot of my classmates were new and the classroom environment was different
- The lesson is more relaxed and helpful
- It was more interactive which ultimately prompted engagement
- Kahoots
- How nice the teachers were
- Marking speed and being early in the morning
- This class is more engaging than a generic math class should sound like
- It wasn't just boring work sheets over and over again, we were allowed to go above and beyond touching some cool concepts like limits and combinatorics, and we were also allowed to do some cool difficult questions.

What made this class different from other math classes? (continued)

- It was a lot less stressful and much more enjoyable.
- It felt as if the class was a group of students willing to learn more. In this class, everyone had questions about everything and it seemed like we always learned something new every class.
- The amount of proofing we did was something I haven't had before in other classes and it really helped me to understand the material. The amount of assessments and how they are steadily paced is also something I haven't had in other classes but it's great. And also the marking is way nicer than my previous math classes.
- A respectable amount of homework and practice
- You clearly put a lot of effort and thought into your lessons, which made them extra special and exciting 😊
